Winter Watering

January - Winter begins and plant growth is on hold until February. Plants need very little water during this time of year, so you can significantly reduce the amount of water you apply to your lawn and shrubs. Now is also good time to prune back trees and shrubs.

Watering Schedule: Between 9:00 am and 6:00 pm. Consider setting irrigation timers to "off", and manually water when your plants and lawns need it. Using the manual mode on your controller in winter can save water.

Winterizing Your Pipes— Avoid a Leak and Save Water this Winter

Before Cold Weather Sets in:

- Make sure you've turned off your irrigation or are watering during the day.
- Know how to shut off your water—Locate your courtesy shut off valve in your meter box and know how to turn it off. Replace if necessary.
- Protect your pipes—Wrap pipes that are exposed to cold with insulation.
- If pipes run through cabinets or vanities, open the doors to let warmer room temperatures in.

If your pipes do freeze...

- Shut off the water immediately. Don't try to thaw pipes before turning the water off.
- As outside temperatures rise your pipes will begin to thaw and your water should be restored.
- Be careful when turning water back on—Once pipes are thawed, slowly turn the water back on and check exposed pipes for cracks or leaks. If there are any leaks turn your water off and make the necessary repairs.

A little preparation could save hundreds of gallons of water! Be sure to prepare for the cold weather this winter by following these easy steps.

If you need assistance, contact the Helendale CSD at 760-951-0006.
